PROFESSIONAL SUMMARY

Frontend Engineer with 3 years of experience building responsive React, TypeScript, and React Native applications from design to production. Published Sabi Ride to both the App Store and Play Store (500+ downloads), and built NestJS and Supabase backends, including a web3 payment-verification API. Skilled at turning designs into clean, consistent interfaces while working alongside designers and backend developers.

WORK EXPERIENCE

Senior Front-End Developer | Mar 2025 – Mar 2026
Motaa – car marketplace platform
- Led front-end development of a React Native car marketplace MVP for Android and iOS, building listings, payments, and navigation features.
- Delivered a design-faithful UI that earned positive feedback from the developers and designers on the team and was presented to the CEO and CTO.
- Wrote Jest tests to improve code stability and catch bugs before release.

Lead Front-End Developer (Jul 2024 – Dec 2024) / Front-End Developer (Mar 2024 – Jul 2024) | Mar 2024 – Dec 2024
Sabi Ride – ride-booking mobile app, live on the App Store and Play Store
- Built and published Android and iOS apps with React Native to both the App Store and Play Store, reaching 500+ downloads.
- Promoted from Front-End Developer to Lead within 4 months, collaborating with 2 backend developers and 2 designers.
- Designed and implemented core app screens from design specs, keeping the UI consistent across platforms.
- Implemented automated testing pipelines to improve release stability.

Front-End Developer (SIWES Placement) | Jan 2023 – Apr 2023
Ahmfatya Concepts Limited
- Built 3 responsive client websites with React.js and Tailwind CSS.
- Tested and optimized code to keep the sites reliable.

Data Entry Assistant | Jun 2021 – Mar 2022
Semlark
- Organized and digitized records to improve data retrieval, and set up networking for surveillance systems.

PROJECTS

Web3 Vending Machine Payments Backend | Personal Project
- Built a NestJS API with Supabase for a web3 mobile app, verifying payments against a smart contract and recording each transaction.
- Generated a one-time password (OTP) for each verified payment so users could redeem their purchase at the vending machine.

Ride Booking App | Personal Project
- Built a NestJS API with Supabase covering authentication, ride requests, driver matching, and trip history.
- Built the mobile front end that consumes the API.

EDUCATION

Air Force Institute of Technology, Kaduna | 2022 – 2026
B.Eng, Information and Communication Engineering

SKILLS
